

FAASTeam presents:

Topic of the Month Series: Preflight after Maintenance

CLOSED EVENT: Open only to members of the Civil Air Patrol.

This presentation acquaints pilots with the benefits resulting from conducting an enhanced preflight examination of aircraft that are being returned to service following maintenance activity.

In this presentation we'll look at an incident caused by a mechanic's mistake, which then was exacerbated by a pilot not noticing that a flight control was operating in reverse, during preflight after maintenance. We'll discuss things to consider adding to your normal checklists after maintenance, as well as the suggestion that you need to pay VERY close attention when preparing to fly for the first time after an annual inspection.

Directions: WINGS class presentation will be given in the Newport News Composite Squadron's new meeting place, in the PHF Main Terminal Conference Room.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
